Graphics: 640*480 pixel over, High Color

DirectX: Version 9.0c

Network: Broadband Internet connection

Storage: 11 GB available space

Sound Card: DirectX 9.0c over

English,Japanese

Reverse tower defense? What? That's exactly it! In Fat Chicken, instead of warding off a throng of enemies, you want to fatten up livestock and welcome them into your slaughterhouse as bloated and fat as possible! The concept may sound disturbing, but it's so silly and exaggerated that you can't help but chuckle. As a matter of fact it was the sheer level of ridiculous that drew me in! The graphics are pleasant and hilarious (gotta say, my first exploding cow absolutely floored me!) There's a wide variety of challenging and different levels, and you can choose your upgrades as you earn enough stars to buy them. I love being able to re-spec my tower upgrades depending on the level. I love that the 3-star challenge changes from level to level, adding a challenging element and making you think! I've gotten hours and hours of fun out of this game! Good work guys!. Best game ever. BTW I'm Russian and this is accurate. Reminds me of home.... One of the best vr games there is. If you box or train mma at all you are going to enjoy this! But even if you don't you will gain some usable skills if you stick with it.. Possibly, the best game that you can purchase with 6 dollars these days. A true competition that has been in development for years, and that we have awaited to purchase on day one. Enjoy it, please.. i love fish and whales and all the other sealife

The kingdom of Tarethiel has been taken over by creatures of hell. Your mission is to cleanse the kingdom and free the citizen from the agonizing wrath of the demon child called Damien. Grab your axe, bow, gun or magic powers and start purging the Gate Keepers and their minions!

Hero Siege is a gore filled Hack N Slash game with heavy Rogue-like elements. Choose a class and start your survival journey. Find secrets, obtain items, slay hordes of different enemies and bosses.. only played it for a short amount of time but there is almost nothing to do , would be cool to see some new features later on.
best of luck with the game ill check it out every now & then.

now some nagging on the achievements... wt* ?coins every 500 up till 100k spend but i can get past that but you have that with fountains & monstersouls & deaths also and deaths goes up till 500 and youll get a achivement every 10 deaths ... Great game. very fun mechanics for combat. very similar to dark souls. lots of secrets to find.. My first ever ND game and one of my favourites!

Plot: Go undercover as 'Becca Sawyer' at an all girls boarding school to investigate threats from the mysterious 'black cat' and a series of accidents, which have targeted the valedictorian candidates. Discover secrets and advance in the case by snooping around, completing puzzles and minigames.
...Who is the 'black cat'?

Warnings at Waverly Academy is a wonderful game! The best part is uncovering the mystery as well as the competition/drama between the girls. This game also features a fun system of credit and demerit points, which Nancy can recieve, and anonymous gossipy texts sent to her phone. It has an enjoyable atmosphere, music and characters!

If you enjoy Nancy Drew and want to buy more in the series, then I recommend buying steam's 'Nancy Drew Collector Pack' to save money.. Fun, but very rough around the edges. Wouldn't recommend in its current state, but with some more polish I definitely would.. This does not support standard PC joysticks, do not purchase this software. I recently purchased the new Ace Combat and that would not work with my Logitech Extreme joystick and the game required that you have a Thrustmaster Hotas 4. Had a little extra cash so went out and bought the game dumb\u2665\u2665\u2665\u2665that I was. The joystick experience sucked. Then purchased Damage Inc which would not work with either my Logitech nor my new Thrustmaster. Low and behold postings now say that this will work with another vendor specific joystick (MadCatz). Steam continues to allow vendors to sell flight sims with vendor specific controllers and this should not be allowed. Do not waste your money on Damage Inc nor Ace Combat. I have since requested a refund for both. Will never buy another flight sim from Steam again. In closing I wish they had different review comments, they have an option for Yes/No for recommending this game. They should add an option for no way in hell should you waste your money.. 'Hunger Games' anyone?

It's cool to be able to change skins for your character but make it unlockable and add special abilities. For this skin, the ability could be infinite arrows and unlocked by killing a certain number of combatants with the bow.
