I tried to upgrade the drivers by right clicking on the device, select Update Driver, choose the folder location where I have downloaded the Silicon Image 3114 SATA driver, it warns me that it might not be the right driver, click yes and I am told.. How to select driver? If you are looking for an update, pickup the latest one If your driver isn't working, use the driver having the same OEM with the your laptop/desktop brand name.. With the different devices, they can have the same driver, it's because they all use the same chip manufacturer.
